| Mărime                          | NH0                                                                            |
| Caracteristici                  | aM                                                                             |
| Tensiune nominală AC (V)        | 690                                                                            |
| Indicator                       | Indicator principal al siguranței                                              |
| Capacitatea de rupere (AC) (kA) | 100                                                                            |
| Putere disipată (W)             | 1,3                                                                            |
| Standarde                       | VDE 0636-2011                                                                  |
| Operare Joule integrală (A2s)   | 8.900                                                                          |
| Curentul de pre-arc (A2s)       | 1.140                                                                          |
| Aplicație                       | Pentru protecția releelor, contactoarelor și motoarelor în caz de scurtcircuit |
